PROFILE

To develop career in the field of Product design and R&D with creativity, new ideas commitment and devotion. Organized candidate successful at managing multiple priorities with a positive attitude. Willingness to take on added responsibilities to meet team goals.

WORK EXPERIENCE

1 Year: Aarohi Embedded systems pvt ltd (Calibration Engineer)

January 2024 to Current

- Address: G 1004-1008A kishan gate main road, near durga weigh bridge. GIDC metoda, gujarat, rajkot, 360021

Electromagnetic Flowmeter

- The Flowmeter works by inducing a magnetic feild into the flow and measuring the voltage generated as the conductive liquid passes through the feild. This allows for accurate and realible flow measurement.
- It Operates based on faraday's law of electromagnetic induction and widely in various industrial and environmental applications.

Leadership In EXPERTIES

- Additional Information** I am also Head of NSS(National Service Scheme) at my university and organized many activities , like a blood donation camp, a tree plantation, a village visit, an awareness camp etc.

- That's all an activity can give me a positive attitude and help to build leadership skills. also, I have played national's in crickes for my university 2 times.

Playing Cricket, Work In Social Activity Like NSS,RSS etc..

- An activity which is not less than MBA because it traches me team work, how to trust and generata affuction among ourselves and the team. It taught me that one bed game (situation in lifel does not defines the whole world cup whole life plan).
